HAJRA

Financial Data Analyst | Data Quality Assurance | Risk & Reconciliation

Lahore, Pakistan • +92 3174357062 • hajragoraya6@gmail.com • linkedin.com/in/hajra-goraya-18a751156

PROFESSIONAL PROFILE & TARGET FOCUS

Accomplished Financial Data Analyst with extensive expertise in market research, data verification, and automated data feed examination, and event driven transaction analysis. Proven track record in inspecting bot captured financial disclosures, evaluating high frequency signals, and ensuring absolute data integrity for global institutional clients (hedge funds, asset managers). Transitioning expertise in high rigor data examination and rule based governance to AI Safety Research, focusing on AI governance frameworks, third party model examination, and technical disclosure standards.

PROFESSIONAL EXPERIENCE

Senior Financial Analyst

2iQ Research, Lahore, Pakistan (Jan 2025 – Present)

- Lead daily data validation and verification of insider trading disclosures across global public exchanges, ensuring 100% accuracy for institutional client feeds.
- Monitor and examine proprietary automated software bots capturing high-volume transaction data; identify scraping errors, data field misalignments, and bot ingestion failures.
- Analyze complex corporate actions, market trades, private block trades, and event-driven M&A activities to construct reliable financial datasets.
- Generate quantitative investment ideas and data-driven trading signals utilized by top-tier hedge funds, asset management firms, and investment banks worldwide.

Financial Data Analyst

2iQ Research, Lahore, Pakistan (Jul 2023 – Dec 2024)

- Evaluated regional market trade data and insider filing reports to build structured databases for corporate governance analysis.
- Collaborated with cross-functional technical teams to refine automated bot scraping rules and improve data ingestion pipelines.

Trainee Analyst

2iQ Research, Lahore, Pakistan (Jan 2023 – Jun 2023)

- Underwent rigorous training in financial market disclosures, insider transaction categorization, and automated data entry verification.
